## FOOD INFORMATION BULLETIN

Vol. 17

September 2024

No. 09

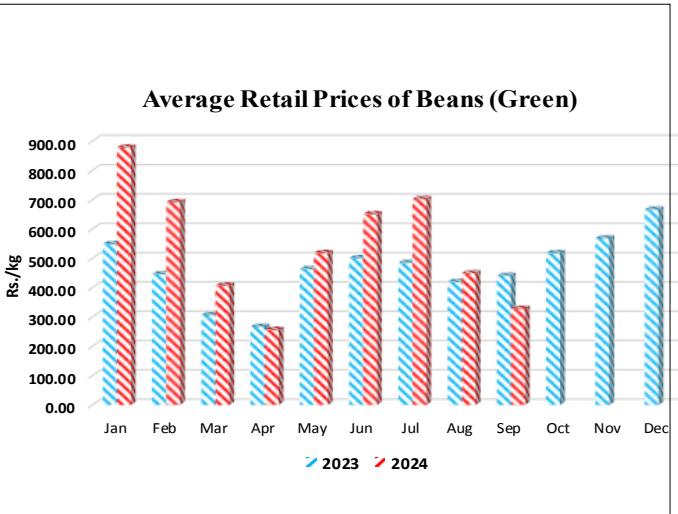

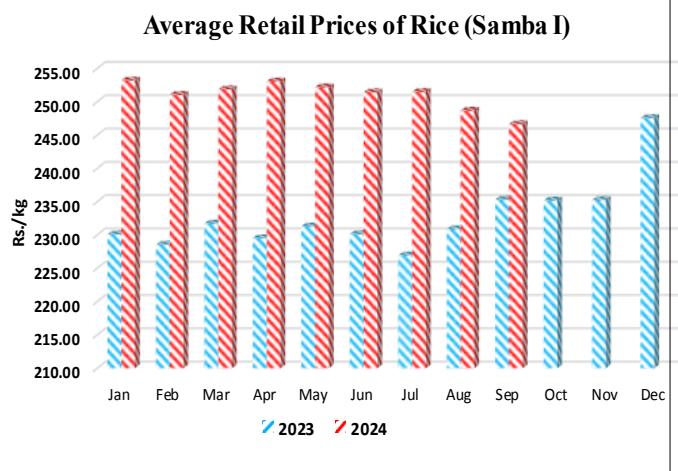

### Highlights

#### Paddy/Rice

- Retail prices for Keeri Samba dropped significantly by 16% compared to the previous month, attributed to increased supply.
- The average retail prices of Samba Grade 1, Keeri Samba, Nadu Grade 1, raw red, and raw white exceeded the government-regulated maximum retail price (MRP).

#### Vegetables

- Prices of most of the vegetables have decreased due to increased supply from the main producing areas.
- Retail prices of up-country vegetables have decreased by 12%-27% and low-country vegetables have decreased by 4%-31%.

### **EXPLANATORY NOTE**

The Food Information Bulletin is a monthly publication containing information relating to producer, wholesale and retail prices of selected food commodities in selected markets in and around Colombo and main markets in the major producing areas. Data on extent, production and imports are also available in the bulletin.

The information is analyzed and presented as, prevailing prices, price ranges, averages and comparison of monthly prices. The changes in prices reported are always in relation to price, which prevailed during the previous month unless otherwise stated.

## 1. Paddy/Rice

### Crop Situation

According to the Crop Forecast from the Department of Agriculture (Yala 2024, Vol. 5), the paddy cultivation target for the 2024 Yala season is 545,113 hectares. By the end of September 2024, the reported sown extent was 490,262 hectares, achieving 90% of the target. Based on this reported sown extent, the forecasted paddy production, accounting for crop losses, is estimated at 2.02 million metric tons.

**Table 1.1: Producer Prices of Paddy - September 2024**

Variety/Area	Price Range	Average Price			Change Compared to

### Producer Prices

Harvesting of paddy was completed in all major producing districts, leading to an increase in producer prices across all paddy varieties. The producer price of short-grain paddy ranged from Rs. 101.00 to Rs. 130.00/kg, showing an increase of 3–9% across all producing areas, with the largest

increase recorded in Nikaweratiya. The producer price of Keeri Samba ranged from Rs. 109.00 to Rs. 132.00/kg, reflecting increases of 6–11% in Anuradhapura, Polonnaruwa, and Dehiattakandiya. The price of long-grain white paddy also rose across all producing areas, with the highest increase observed in Nikaweratiya. Among all paddy varieties, long-grain red experienced the highest price increase, ranging from 9–14%.

Compared to the same period last year, producer prices for all paddy varieties, except Keeri Samba, increased across all price collection areas, with long-grain red showing the most significant rise of 24–30%. In contrast, the producer price of Keeri Samba dropped by 7–10% across all price collection locations.

## Rice - Prices Demand/Supply Situation

### Wholesale Prices

Wholesale prices for Nadu, raw red, and raw white rice varieties increased by 4–7% compared to the previous month. The largest price increase, 6%, was recorded for raw red due to reduced supply, with prices ranging from Rs. 200.00 to Rs. 215.00/kg. Wholesale prices for Samba Grade I remained unchanged, ranging from Rs. 225.00 to Rs. 235.00/kg.

The average wholesale prices of Samba Grade I, Nadu Grade I, and Keeri Samba exceeded the maximum retail price, even at the wholesale level. Compared to the same period last year, wholesale prices for all rice varieties, except Keeri Samba, rose by 4–17%, with raw red experiencing the highest increase of Rs. 31.00/kg.

### Retail Prices

Retail prices for Keeri Samba dropped significantly by 16% compared to the previous month, attributed to increased supply. The average retail prices of Samba Grade 1, Keeri Samba, Nadu Grade 1, raw red, and raw white exceeded the government-regulated maximum retail price (MRP). Imported Ponne Samba was also available in retail markets, with prices ranging from Rs. 280.00 to Rs. 320.00/kg. Compared to the same month last year, retail prices for most rice varieties increased by 1–11%, with raw red showing the highest rise of Rs. 61.00/kg. In contrast, the retail price of Keeri Samba decreased significantly by Rs. 42.00/kg compared to last year.

## 2. Other Field Crops

### 2.1 Chilli

#### Crop Situation

By the end of September 2024, the cultivation progress of green chili in most major producing areas was satisfactory compared to the previous Yala season. The target land extent for green chili cultivation in Yala 2024 was 7,374 hectares, of which 5,736 hectares had been cultivated by the end of September, achieving 78% of the target.

In the Anuradhapura district, approximately 593 hectares were cultivated by the end of September, representing 96% of the district's targeted extent. Based on the cultivated area, the expected production of green chili for this Yala season is estimated at 36,419 metric tons. The supply distribution is anticipated to come primarily from Anuradhapura (13%), followed by Puttalam (10%), Mahaweli areas (9%), Jaffna (7%), and Batticaloa (7%).

**Table 2.1.1: Target and Cultivation progress of green chili for Yala 2024**

Areas	Targeted Extent (ha)	Cultivation progress by the end of September, 2024		Expected production (Mt)
		Cultivated extent (ha)	% of the targeted extent

## Prices and Supply/Demand Situation

In September 2024, the supply of green chili from major producing areas increased at the beginning of the month, resulting in a decrease in both wholesale and retail prices. Wholesale prices dropped by approximately Rs. 86.00/kg, while retail prices declined by Rs. 173.00/kg. The wholesale price of green chili ranged from Rs. 80.00/kg to Rs. 300.00/kg, while retail prices varied between Rs. 180.00/kg and Rs. 600.00/kg. The highest producer prices were recorded in the Anuradhapura area, where prices ranged from Rs. 232.00/kg to Rs. 288.00/kg during September. Compared to the same period last year, wholesale and retail prices of green chili decreased by 61% and 45%, respectively.

In the same month, Sri Lanka imported 2,854 metric tons of dried chili, an increase of 783 metric tons compared to the previous month. The average CIF price for imported dried chili was Rs. 532.65/kg, reflecting a decrease of Rs. 10.18/kg from the previous month. Wholesale and retail prices of imported dried chili decreased by approximately Rs. 44.00/kg and Rs. 89.00/kg, respectively. Wholesale prices for imported dried chili ranged from Rs. 650.00/kg to Rs. 800.00/kg, while retail prices ranged from Rs. 700.00/kg to Rs. 1,200.00/kg. Compared to the same period last year, wholesale and retail prices of imported dried chili declined by approximately 31% and 30%, respectively.

## 2.2 Big Onion and Red Onion

### Crop Situation

The targeted extent for big onion cultivation in the 2024 Yala season was approximately 3,943 hectares. However, by the end of September 2024, only 1,428 hectares had been cultivated, achieving just 36% of the target. Notably, no cultivation activity was reported in major producing areas during this period.

**Table 2.2.1: Cultivation progress of Red Onion for Yala 2024**

Area	Targeted Extent (Ha)	Cultivation progress by the end of September,2024		Expected production (Mt)
		Cultivated extent (ha)	% of the targeted extent	
Matale	1647	421	26	6,538
Anuradhapura	475	241	51	3,747

Source: *Crop Forecast, Yala 2024, Volume 05, Department of Agriculture*

The targeted extent for red onion cultivation in the 2024 Yala season was set at 3,489 hectares, with approximately 2,672 hectares cultivated by the end of September 2024, achieving 76% of the target. The Jaffna district recorded both the highest targeted extent (2,086 hectares) and the highest cultivated extent (1,880 hectares), achieving 90% of its target. The estimated production for this Yala season is 29,966 metric tons, with 84% of the supply expected from the Jaffna (70%) and Puttalam (14%) districts.

**Table 2.2.2: Cultivation progress of Red Onion for Yala 2024**

Area	Targeted Extent (Ha)	Cultivation progress by the end of September,2024		Expected production (Mt)
		Cultivated extent (ha)	% of the targeted extent

### Prices and Supply/Demand Situation

The market supply of big onions in September 2024 included both imported and locally produced varieties. Limited stocks of local big onions were available in the wholesale market, with prices ranging from Rs. 220.00 to Rs. 290.00/kg and retail prices between Rs. 300.00 and Rs. 360.00/kg. A total of 16,368 metric tons of big onions were imported during the month, marking a decrease of 11,149 metric tons compared to the previous month. The average CIF price for imported big onions was Rs. 80.70/kg, reflecting a decrease of Rs. 19.61/kg from the previous month. Despite this, wholesale and retail prices of imported big onions increased by Rs. 16.00/kg and Rs. 25.00/kg, respectively. Wholesale prices for imported big onions ranged from Rs. 160.00 to Rs. 290.00/kg,

while retail prices varied between Rs. 210.00 and Rs. 360.00/kg. Compared to the same period last year, the retail price of imported big onions increased by 30%.

The supply of local red onions from major producing areas increased during the month. However, the wholesale price of vedalan rose by approximately Rs. 2.00/kg due to its superior quality, while the price of sinnan decreased by Rs. 16.00/kg. Wholesale prices for sinnan ranged between Rs. 140.00 and Rs. 200.00/kg, while vedalan prices ranged from Rs. 250.00 to Rs. 370.00/kg. In contrast, retail prices for both varieties decreased, with vedalan dropping by approximately Rs. 48.00/kg and sinnan by Rs. 26.00/kg. Retail prices ranged from Rs. 300.00 to Rs. 380.00/kg for sinnan and Rs. 380.00 to Rs. 500.00/kg for vedalan. No imported red onion stocks were available in the market.

#### 2.2.3: Wholesale and Retail Prices of Red Onion and Big Onion (Rs/kg) September 2024

## 2.3 Potato

### Crop Situation and Progress

The targeted extent for potato cultivation in the Yala 2024 season was set at 3,097 hectares, with approximately 1,629 hectares cultivated by the end of September, achieving 53% of the target. This shortfall is primarily attributed to the limited availability of seed potatoes. However, the cultivated extent by the end of Yala 2024 exceeded that of the Yala 2023 season. Compared to the same period in Yala 2023, the cultivated extent in Yala 2024 represents 104% of the previous year's achievement. Based on the cultivated extent as of the end of September, the expected production of potatoes for Yala 2024 is estimated at 21,158 metric tons.

### Prices and Supply/Demand Situation

In September 2024, a total of 9,510 metric tons of potatoes were imported, which was 12,917 metric tons less than the quantity imported in August 2024. The total value of these imports amounted to Rs. 905 million, with an average CIF price of Rs. 95.00/kg.

**Table 2.3.1: Quantity, Value and CIF Prices of Imported Potato – Apr 2024 - Sep 2024**

Month	Quantity (Mt)	Value (Rs.mn)	CIF Price (Rs/kg)	Retail Price (Rs/kg)	Gross Margin (RP-CIF) (Rs/kg)
Sep-2024	9510	905	95.16	220.81	125.65

Both local and imported potato stocks were available in the market during September 2024. The harvesting of Welimada potatoes commenced at the end of August, contributing to the market supply. On average, producer prices for Welimada potatoes were Rs. 204.00/kg, while Nuwara Eliya potatoes averaged Rs. 255.00/kg. Stocks of both varieties were widely available throughout the month. Wholesale prices of Nuwara Eliya potatoes decreased by 25%, and retail prices for both Nuwara Eliya and imported potatoes dropped by 11–12%.

Compared to the same period last year, retail prices for Nuwara Eliya potatoes increased by 16%, while prices for imported potatoes rose by 3%. However, prices of local potatoes are expected to decrease in October with the arrival of additional imported stocks and the Yala season potato harvest.

## 2.4 Green gram and Cowpea

### Crop Situation

According to the Crop Forecast Yala 2024 - Final (Vol. 05) by the Socio-Economics & Planning Centre/DOA, 24% of the cowpea cultivation extent in Yala 2024 was reported as damaged. Despite this, the forecasted production is expected to reach 98% of the production achieved in Yala 2023, based on data from the Department of Census and Statistics.

The cultivation extent of green gram exceeded the three-year average for the monthly cultivated area, while cowpea cultivation also surpassed the three-year average in May, June, July, and September. In contrast, black gram cultivation remained below normal throughout Yala 2024, including September, except for the month of July.

### Prices and Supply/ Demand Situation

The wholesale and retail prices of green gram in September 2024 ranged from Rs. 650.00–800.00/kg and Rs. 780.00–1,200.00/kg, respectively. Compared to the same period last year, both wholesale and retail prices of green gram decreased by 13% and 15%, respectively.

In contrast, the retail prices of both white and red cowpeas ranged between Rs. 800.00–1,200.00/kg. Compared to the same period last year, a price increase of approximately 15% was recorded for both white and red cowpeas.

**Table 2.4.1: Wholesale and Retail price of Green gram and Cowpea- September 2024**

## 2.5 Red dhal

### Prices and Supply/Demand Situation

The wholesale price of red dhal ranged between Rs.260/kg and Rs.275/kg with an average of Rs.266/kg, and the retail price ranged between Rs.275/kg and Rs.360/kg with an average of Rs.313/kg. The wholesale price has decreased by 12% and the retail price has decreased by 7% compared with September 2023.

**Table 2.5.1: Wholesale and Retail Prices of Red dhal (small) -September 2024**

Item	Price Range	Average Price			Change Compared to

### 3. Vegetables

#### Crop Situation

The cultivation progress for up-country and low-country vegetables in Yala 2024 has been reported as 93% (16,363 hectares) and 100% (22,903 hectares), respectively. Several crops, including carrot, leeks, radish, pumpkin, okra, brinjal, ash plantain, winged bean, and kekiri, have exceeded their respective cultivation targets.

Carrot, leeks, and cabbage cultivation areas increased due to the limited availability of seed potatoes, leading farmers to plant these vegetables on potato lands instead. The expected production of carrots is higher than in the 2023 Yala season, although it is still lower than the production levels of the 2022, 2021, and 2020 Yala seasons, as per the Crop Forecast, Vol. 05, Yala 2024 from the Socio-Economics & Planning Center/Department of Agriculture.

#### Prices and Supply/Demand Situation

Prices of most vegetables have decreased due to the increased supply from major producing areas. The wholesale prices of many up-country vegetables have dropped by 10% to 41%, with the largest decrease reported for beans at Rs. 105.00/kg. However, prices for knolkhol and radish have increased by 12%. Tomato prices have decreased by 6%, amounting to a reduction of Rs. 9.00/kg. For low-country vegetables, wholesale prices have decreased by 2% to 50%, except for brinjal, cucumber, bitter gourd, snake gourd, drumstick, and luffa. The highest price decrease of Rs. 121.00/kg was recorded for capsicum. Additionally, green chili and lime prices have dropped by 34% and 17%, respectively.

Compared to the same period last year, wholesale prices for most vegetable varieties have increased by 1% to 249%, with the highest price increase reported for drumstick.

**Table 3.1: Wholesale Prices of Vegetables – September 2024**

Item	Price Range		Average Price			Change Compared to

Source: Data Management Division/HARTI

In line with the decrease in wholesale prices, retail prices for most vegetable varieties have also decreased. Retail prices for up-country vegetables have dropped by 12% to 27%, with the largest decrease of Rs. 121.00/kg reported for beans. However, prices for knolkhol and radish have increased by 3%.

For low-country vegetables, retail prices have decreased by 4% to 31%, with the price of drumstick rising by 49%. The highest average price of Rs. 566.00/kg was recorded for capsicum, while the lowest price of Rs. 169.00/kg was observed for pumpkin. Additionally, the prices of green chili and lime have decreased by 31% and 26%, respectively.

Compared to the same period last year, retail prices for most vegetable varieties have increased by 2% to 64%, with the highest price increase reported for drumsticks.

## 4. Fruits

### Prices and Supply/Demand Situation

In September 2024, the wholesale prices of most major fruit types decreased, with some exceptions. For bananas, the prices of ambun, seeni, ambul, and anamalu varieties decreased by 2% to 6%. However, the price of kolikuttu bananas increased by 23% due to a low stock position. Pineapple prices for both large and medium sizes decreased by 3% and 6%, respectively, as sufficient stocks became available. For mangoes, only two varieties—karthakolomban and vilad—were available in the market. The price of karthakolomban decreased by 6% due to low-quality stocks, while the price of vilad mango increased by 14% due to limited stock availability.

Other fruit varieties saw price increases due to limited supply in the market. The price of wood apple rose by 61% due to low supply from major producing areas. Additionally, prices for passion fruit (22%), slime apple (10%), and avocado (9%) increased. Conversely, the prices of wood apple and orange decreased by 18% and 15%, respectively, due to the seasonality of the harvest period. Compared to the same period last year, the wholesale prices of most fruit varieties have increased, with the highest price increase of 96% reported for passion fruit.

Source: Data Management Division/HARTI

In September 2024, retail prices for most major fruit varieties decreased, in line with the behavior of wholesale prices. However, there were some exceptions. The price of kolikuttu bananas increased by 8%, while the prices of other banana varieties remained largely unchanged. For mangoes, the retail prices of both karthakolomban and vilad varieties decreased by 32% and 13%, respectively. Pineapple prices also saw a decrease, with prices for large and medium sizes dropping by 11% and 7%, respectively. In the Colombo suburbs markets, medium-sized pineapples ranged between Rs. 320.00–650.00 per fruit.

In contrast, the retail prices of many other fruit varieties increased due to rising wholesale prices. Prices for papaw (28%), slime apple (25%), and avocado (15%) increased. However, the prices of wood apple (27%) and orange (8%) decreased due to the lower wholesale prices.

Compared to the same period last year, retail prices for most fruit varieties have increased, with the highest price increase of 99% reported for avocado.

### Exports/Imports of Fruits

According to Sri Lanka Customs, Sri Lanka had exported 1,348 mt of fresh fruits in September, 2024 to the value of Rs.163 mn. Of the total exported quantity of fresh fruits, 97% were papaw. Compared to September 2023 (1,913 mt), the exported quantity had decreased during this year (Table 4.3).

With reference to imports, Sri Lanka had imported 816 mt of fresh fruits during the month and the value was Rs.325 mn. Apple was the mostly imported fruit type with the quantity of 478 mt, followed by grapes (257 mt). Compared to the same period of last year, the imported quantity had decreased during this year (Table 4.4).

*Source: Data Management Division/HARTI*

Headline inflation, as measured by the year-on-year (Y-o-Y) change in the Colombo Consumer Price Index (CCPI, 2021=100) recorded a negative value recording a deflation of 0.5% in September 2024, for the first time since September 2015. Food category recorded a deflation (Y-o-Y) of 0.3% in September 2024 compared to the inflation of 0.8% in August 2024.

However, despite the trend of price deflation, the prices of most fish varieties saw a slight increase in September. This was due to the comparison with August, which experienced a significant price drop. Supplies continued to flow into the market during the middle phase of the main season along the Southern and Western coasts.

The highest price increase was reported for kelawalla at 15% followed by thalapath at 11% and both shrimp (small) and thora at 10%. Prices of remaining varieties had increased in the range of 3% -8%, except for mora. However, prices of mora had dropped by 3%. In comparison to the same period in the previous year, wholesale prices for most fresh fish varieties had slightly increased, ranging from 1% to 11%, with the highest drop increase for hurulla.

In line with price variation in the wholesale market, prices of most of the fish varieties, had slightly increased in the retail market. The highest price increase was reported for balaya at 6%. Prices of

remaining fish varieties, except for paraw had increased in the range of 1% - 4%. Meanwhile, prices of paraw had decreased by 3%. When compared to the same period of the previous year, retail prices for most of the fresh fish varieties had decreased, with the most significant decrease noted for salaya at 30%.

Source: Data Management Division/HARTI

In line with the price variation in fresh fish prices, wholesale prices of most of the dried fish varieties also experienced a slight increase compared to last month. This is due to the comparison of prices against August, which recorded a high price drop. The highest price increase at the wholesale level was recorded for salaya as 11%. Additionally, prices of balaya had decreased at 8%. The prices of remaining dried fish varieties had dropped by less than 4%, except for kattawa (imported), mora and maduwa. Compared to the same period of the previous year, wholesale prices for most of the dried fish varieties had dropped with the highest was reported for kattawa (imported) at 13%.

In line with the wholesale price variation, prices of 50% of the dried fish varieties had increased at the retail market. The highest price increases were reported for salaya at 8% and balaya at 4% at the retail level. However, prices of sprats dropped by 3% followed by maduwa and kattawa at 2% at the retail level. Compared to the same period of the previous year, retail prices of most of the dried fish varieties had dropped with the highest was reported for both balaya and kattawa at 15%.

### Eggs - Prices and Supply/Demand Situation

*Source: Data Management Division/HARTI*

Due to the combined effects of high supply and reduced demand (following the election and curfew), egg prices dropped significantly in September 2024 compared to the previous month. At the wholesale level, the price of brown eggs decreased by 8% per egg, while the price of white eggs dropped by 9% per egg. At the retail level, the price of a brown egg decreased by 7%, and the price of a white egg decreased by 6%. The average retail prices were Rs. 41.50 per brown egg and Rs. 40.00 per white egg. Compared to the same period last year, the retail prices of brown and white eggs have decreased by 12% and 13%, respectively.

*Source: Data Management Division/HARTI*

Compared to August, prices of most of the meat varieties had slightly dropped at the retail market due to discontinued demand as a result of election and curfew. The highest price drop was noted for chicken (broiler) at 5% followed by chicken (curry) at 4% and pork at 3%. Pork prices continued to decrease due to wide spreading swine flu. Compared to last year, prices of most of the meat varieties had decreased with the highest was reported for chicken (broiler) and chicken (curry) at 12%.

## 6. Wheat grain, Wheat flour and Sugar

### Wheat grain and Wheat flour
